SKILLS

TypeScript

React

Node.js

Python

Next.js/Gatsby

Jest/Vitest

SQL

LANGUAGES

English
Native

Spanish
Fluent

Seeking a challenging role that will allow me to further my development skills and use those skills to teach other developers as well.

WORK EXPERIENCE

Pillar HR (July 06, 2021 - Present)
Senior Software Engineer

- Built a system to allow phone calls to be recorded and integrated into the interview platform
- Integrated various 3rd party tools to ingest and publish data between our platform and theirs
- Set up a recording bot to automatically join Teams meetings and provide recordings when an official integration wasn't yet complete
- Built a browser extension with integrated auth to allow users to access interview data outside of application
- Designed and coded a scoring system to provide an overview of interviewer responses

Fenway Group (December 27, 2017 - June 30, 2021)
Full-Stack Web Developer

- Designed and developed REST APIs and backend services for vital crew applications at Southwest Airlines, both on-prem and in the cloud.
- Developed an integration service between new and legacy applications at Southwest that use various data models (XML, SOAP, JSON).
- Re-architected AWS infrastructure for a highly available, international study platform and built an international donations site for Bible Study Fellowship.
- Built an Ecommerce site for SALT Lending Inc. and integrated a customer service and ticketing service.
- Taught professional Scrum Developer training course to 20 developers.

PROJECTS

Tweet to Markdown
TypeScript

A Node.js CLI that saves tweets to Markdown in beautiful format, including polls, images, etc.

🔗 https://github.com/kbravh/tweet-to-markdown

Obsidian Tweet to Markdown plugin
TypeScript/Obsidian.md

A plugin version of my Tweet to Markdown tool, downloaded by over 4000 users.

Scriptly
JavaScript/React/GatsbyJS/Node.js

An internationalized templating website that creates scripture-styled versions of documents. Built using AWS Lambda for server logic, with a state machine driving frontend state.
